1800 BIG JOE (1800 244 563)

### CAPACITY

**1500kg**

at 600mm load center

### WEIGHT

**3030kg**

Chassis Only

### PERFORMANCE

**150 Ah**

48 volt lithium batteries with 150 Ah capacity ZAPI AC travel control.

### TYRES/WHEELS

FRONT DRIVE X 2  
6.5-10 solid pneumatic  
DUAL STEER TIRE  
5.00-8 solid pneumatic

### TRAVEL SPEED

9 km/h

### LIFT

Up to 0.4m/s empty  
Up to 0.3m/s loaded

### LOWERING

Up to 0.4m/s empty  
Up to 0.4m/s loaded

### OPERATOR COMPARTMENT

Ergonomic roomy cab, wide view mast, hydrostatic power steering with spinner knob, adjustable steering column and adjustable suspension seat ensures comfortable working position. Hydraulic controls: lift/lower, tilt, and load side-shift within easy reach of operator.

Large "wide view" reversing mirror increases operation efficiency. Side hand rail aids operator comfort in reverse driving position.

### ELECTRICAL

AC technology fitted to heavy-duty applications. Electrical current is optimized and AC motors are brushless, which minimises servicing. "neutral braking" eliminates truck roll-back and allow higher travel speeds. Diagnostic display with thirty performance travel and lift parameters can be adjusted to suit all types of loads, working condition's area and operator driving skill.

### ON-BOARD CHARGER PROVIDES OPPORTUNITY CHARGING

Due to the usage of Li-Ion technology in combination with an onboard charger, the L15 is the most versatile truck you can find on the market. Plug it into any standard power outlet and the battery will be opportunity charged. No need for any external charging device. Just Plug&Play.

### FRAME AND MAST

High stability chassis with long wheelbase, wide tires and low center of gravity. "See Thru" integral side-shift with load back rest (LBR). Wide view mast, low scuttle and high seating position gives the operator an excellent view, reducing load damage and accidents. Fully enclosed chassis weldment house the dual drive motors.

### HYDRAULICS

Powerful hydraulic lift motor provides smooth high torque lifting and lowering. Hydraulic lift and drive components are sealed against dirt and water protecting them from contamination.

### SERVICEABILITY

The state-of-the-art controller can be easily accessed at waist height, reducing service time.
